

Project Title: Meme Origin

Author: S.P Thiru Ragavan

Internship Role: Software Engineering Intern

Organization: WEBBED TEAM

Project Overview

Meme Origin is a web-based application designed to explore the origins, meanings, and evolution of internet memes. The platform allows users to search for a meme keyword and understand how a normal word or phrase became a viral meme.

Objective

- To create an informative and entertaining platform
- To demonstrate frontend development skills
- To build a scalable meme knowledge system

Features

- Keyword-based search
- Dynamic content rendering
- Embedded media support
- Clean and modern UI

Tech Stack

HTML, CSS, JavaScript

How to Run

Open index.html in any modern browser.

Future Scope

More memes, categories, and UI improvements can be added.
